PLUGINS: Enhancing a
website template is one
of the many things I
teach kids. Selecting,
installing, configuring
and customizing
Wordpress plugins... see:

CMS: I'll admit, I use a
lot of flat-file
generators like Jekyll.
But clients, non-
programmers, need a
user-friendly, and
highly customizable CMS
like WordPress. And that
is my expertise. I can
even code-in custom menu
pages in the backend
admin portal.

PWAs: Beyond WordPress,
I've coded many
'Progressive Web Apps'.
Code once, deploy
everywhere, from the
desktop browser to
android native! View my
